

Ruxins Logistics Management System

User Guide

WEB PAGES AND THEIR FUNCTIONS DESCRIPTIONS:

Owners (Alissa&Josh): Every page, plus Analytics.

Drivers (Eugene&Willy): Dashboard, Check IN/OUT, Schedule, Petty Cash, Vehicles, and First-Aid-Kit.

HouseStaff(Alpho&Eric): Dashboard, Petty Cash, and First-Aid-Kit only.

1. Dashboard: *Seen by, everyone (but, Owners, Drivers, & House staff, each has different home page)*

What you see when you log in: summary cards for your role. At the bottom is the day's schedule. Use Previous and Next to look at other days, and Share Schedule to send it to WhatsApp.

2. Petty Cash: *Seen by, everyone*

Click a car's name to open it. Withdraw records money taken out. Refill records money put in: a refill from Alissa or Josh waits for a driver to confirm it arrived, while a driver's or house staff's counts straight away.

3. Check IN/OUT (shown as Worked Hours for Alissa & Josh): *Seen by, everyone except house staff*

Drivers press Sign In when they start and Sign Out when they finish, or OFF DAY when not working at all. Alissa and Josh see every driver's hours and weekly totals.

4. Vehicles: *Seen by, everyone except house staff (Alpho & Eric)*

Each car shows its photo, specifications, Car Supplies checklist and documents. Drivers tick a supply when it is in the car; anything left unticked is flagged on everyone's dashboard.

5. First-Aid-Kit: *Seen by, everyone*

Click a car's name to open its kit. Search for a medicine and press Consume to record what you used; the stock goes down automatically.

6. Schedule: *Seen by, everyone (but, house staff won't make any change on the schedule, they just look)*

The day's trip plan. Anyone (except house staff) on this page can add, edit or delete an entry, and tick one off once it is done. The finished schedule is what everyone sees on their dashboard.

7. Analytics: *Seen by, Alissa & Josh Only*

The Owners (Alissa & Josh), see the Charts of spending, working hours and car's first aid medicines used, with PDF reports ready to download.
